PROFESSIONAL SUMMARY

An Engineering student specializing in Cybersecurity and Data Analytics. Combines a strong foundational knowledge of technical security concepts with practical experience in data-driven problem solving and digital systems. Completed FortiGate network security training at BARQ Systems and built real-world Flutter apps. Proactive and fast learner seeking a Cybersecurity Internship to apply academic knowledge, develop practical skills in offensive/defensive security, and contribute to securing organizational assets.

EDUCATION

Menoufia University, Faculty of Electronic Engineering

- Major: Cybersecurity and data analytics
- Dates: 2023 – Present
- Cumulative Grade: Very Good

EXPERIENCE

BARQ Systems – Network Security Trainee **SEP 2026**

- Completed hands-on training in network security, focused on Fortinet FortiGate firewalls.
- Worked with firewall configuration and network security concepts in a professional environment.

PROJECTS

Built with my studio Logika · logika-eg.pages.dev

ERP System for a Maintenance Company **Flutter**

- Built an ERP app that the company uses daily on both mobile and desktop to manage its work.

Real Estate App **Flutter**

- Built an app with a gallery for each section (units, finishing and furnishing) in Arabic and English.
- Users can list a unit for sale with photos, price and location from their phone, and track their listings and requests.

Zaboon – Secure Customer System **Flutter · Security**

- Built a customer management system with security designed in from the start.
- Tested and closed 5 attack paths before delivery.

TRAININGS & CERTIFICATIONS

Network Fundamentals - Mahara tech **JUN 2026**

Digital Egypt Pioneers Initiative **JUN 2025 – DEC 2025**
Track: Digital Marketing

IEEE – ALAZHAR **NOV 2025 – MAY 2026**

Track: Flutter Mobile Application Development

SKILLS

Technical Skills

- **Networking:** Basic understanding of Network Fundamentals and core routing concepts.
- **Network Security:** Hands-on training with Fortinet FortiGate firewalls and network security concepts.
- **Mobile Development:** Flutter and Dart, connecting apps to REST APIs, Firebase and Supabase.
- **Operating Systems:** Familiarity with Linux command-line interface (CLI) basics.
- **Scripting & Coding:** Introductory knowledge of Python programming and basic Bash scripting concepts.
- **Security Concepts:** Overview of Offensive Security principles and web hacking concepts.

Soft Skills

- **Problem Solving:** Analytical mindset derived from engineering background.
- **Self-Learning:** Ability to explore new technical topics independently, such as Linux and scripting basics.
- **Analytical Thinking:** A logical approach to understanding technical concepts and breaking down computing problems.
- **Commitment to Growth:** Proactively seeking training opportunities to expand knowledge across different technical tracks.
- **Task Organization:** Managing academic requirements alongside external technical learning and courses.

LANGUAGES

- **Arabic:** Native
- **English:** C1 (Advanced)
